

## **Red Database 2.1.0**

**Note!!!** for using cryptographic functions you must have installed CryptoPro 3.0 or later (<http://cryptopro.ru/cryptopro/download/default.asp>).

### **Known issues**

The follow features added into Red Database 2.1 as experimental:

1. Login Policies;
2. Record and column filtering (UseRecordFilter parameter in firebird.conf)
3. Audit system and log analyzer;
4. Multifactor authentication;
5. External SP and UDF were tested on Windows only.
