

Red Database 2.1.3

Note!!! For using cryptographic functions you must have installed CryptoPro 3.6 or later (<http://cryptopro.ru/cryptopro/default.asp>).

Note!!! For using External SP and UDF you must have installed JDK 1.5 for Linux and JDK 1.6 for Windows

Known issues

The follow features added into Red Database 2.1.3 as experimental:

1. Login Policies;
2. Record and column filtering (UseRecordFilter parameter in firebird.conf)
3. Audit system and log analyzer;
4. Multifactor authentication;
5. External SP and UDF were tested on Windows only.
